Attentive

Work Experience / Projects

Frontend Projects:

- Batatabit: **design** of cryptocurrency exchange website using **HTML** and **CSS** - ([Demo](#)).
- Juilliard School Website Clone: A practice visualizing the official Juilliard School Website using **HTML**, **CSS**, and **JavaScript (Responsive design)** - ([Demo](#)).
- Google Clone: Developed a React project of a google clone using **HTML**, **CSS**, **React.js**, and **react-router-dom** - ([Demo](#)).
- Movie Plus: SPA making a movie website consuming an **API REST** using **Axios (Asynchronous - async/await)**, developed with **HTML**, **CSS**, and **JavaScript (Responsive design)** - ([Demo](#)).
- Pokedex: App of Pokemon developed with **React Native** implementing **Stack** and **Tab** from **react-navigation** - (Github [repository](#)).
- Netflix Clone: Built a Netflix Clone using **React.js**, **Hooks/Customs Hooks (State, Effect, Context, Ref, SearchParams, Reducer)**, **react-router-dom**, implementing a **global state**. This app has the functionality to search for movies, render movies, and show trailers using the **IMDb / TMDb APIs (Responsive design)** - ([Demo](#)).

Full Stack Projects:

- ToDo App: Developed a functional ToDo list made with **React.js** and **Bootstrap** layout in the **front-end** part and with **Django REST-Framework** in the **back-end** part, creating a system to allow **CRUD** operations. (Github [repository](#)).
